

"Power of Chemistry Education
for Advancing **SDGs**"

SYMPOSIUM A:

The 12th International Symposium on Microscale Chemistry (12ISMC)

July 15-16, 2024

(July 16, 2024 for Poster Presentation)

Chair

Supawan Tantayanon (Thailand)

Co-Chair

Jorge G. Ibanez (Mexico)

Small-Scale Chemistry (Microscale Chemistry) has been at the heart of a revolution in the teaching of laboratories. It has shown numerous advantages from the environmental, economic, safety, time, social acceptance, accessibility, legal, storage, etc., perspectives. The previous eleven international symposia give account of its importance in the arsenal of environmentally-oriented strategies in varied chemistry areas. The celebration of the 12th International Symposium on Microscale Chemistry (12ISMC) to be held in Pattaya, Chonburi, Thailand in July 2024, in connection with the IUPAC 27th International Conference on Chemical Education (ICCE2024) will be a unique opportunity to share and discuss ideas related to this prominent approach. Besides the oral and poster presentations, several workshops are expected.

Registration is now available

www.icce2024thailand.com

ATTENTION

- 1.) All poster presentations will be on July 16, 2024 at 17:40-21:00 (with a cocktail reception)
- 2.) Scholarships (to cover the conference registration fee) for school teachers and students have been offered.
- 3.) A one-day registration fee rate is available.
